Application No: 09/821,183  
Attorney's Docket No: US010105**CLAIM AMENDMENTS**

This listing of claims will replace all prior versions and listings of claims in the application.

**Listing of Claims**

1. (Currently Amended) A method for controlling a media player, comprising:

establishing at least one rule defining a predefined user activity, said rule including at least one condition, ~~and additional information external to a user, and wherein the additional information external to said user includes a feature of media on said media player and said rule including an action item to be performed to automatically adjust said media player in accordance with action preferences of said user when said condition rule is satisfied, wherein the additional information external to said user includes a feature of media on said media player;~~

analyzing at least one of audio and video information focused on said user to identify said condition; and

performing said action item if said condition rule is satisfied.

2. (Original) The method of claim 1, wherein said user activity suggests that said user is not paying attention to said media player and said action item is the issuance of a command to pause said media player.

Application No: 09/821,183  
Attorney's Docket No: US010105

3 (Original) The method of claim 1, wherein said user activity suggests that said user is not paying attention to said media player and said action item is the issuance of a command to said media player to begin recording.

4 (Original) The method of claim 1, wherein said user activity suggests that said user is not paying attention to said media player and said action item is the issuance of a command to said media player to enter a power save mode.

5 (Original) The method of claim 1, wherein said user activity is a predefined gestural command and said action item is the issuance of a corresponding command to said media player.

6 (Currently Amended) A method for controlling a device, comprising:

analyzing at least one of audio and video information focused on a user to identify at least one predefined user activity;

analyzing additional information external to a external user, wherein the additional information external to said user includes a feature of media on said device; and

performing a predefined action item to automatically adjust said device in accordance with action preferences of said user based on said additional information when said user activity is identified, wherein the predefined user activity is not related to controlling the device.

Application No: 09/821,183  
Attorney's Docket No: US010105

7. (Currently Amended) The method of claim 6, wherein said device is a media player, ~~and~~  
said user activity suggests that said user is not paying attention to said media player, and said  
action item is the issuance of a command to pause said media player.

8. (Currently Amended) The method of claim 6, wherein said device is a media player, ~~and~~  
said user activity suggests that said user is not paying attention to said media player, and said  
action item is the issuance of command said media player to begin recording.

9. (Currently Amended) The method of claim 6, wherein said device is a media player, ~~and~~  
said user activity suggests that said user is not paying attention to said media player, and said  
action item is the issuance of a command to said media player to enter a power save mode.

10. (Cancelled)

11. (Currently Amended) A system for controlling a media player, comprising:

a memory for storing computer readable code; and

a processor operatively coupled to said memory, said processor configured to:

Application No: 09/821,183  
Attorney's Docket No: US010105

establish at least one rule defining a predefined user activity, said rule including at least one condition and an action item to be performed to automatically adjust said media player in accordance with action preferences of a user when said condition ~~rule~~ is satisfied;

analyze at least one of audio and video information focused on said a-user to identify said condition;

analyze additional information external to said user, wherein the additional information external to said user includes a feature of media on said media player; and

perform said action item based on said additional information if said condition rule is satisfied.

12. (Original) The system of claim 11, wherein said user activity suggests that said user is not paying attention to said media player and said action item is the issuance of a command to pause said media player.

13. (Original) The system of claim 11, wherein said user activity suggests that said user is not paying attention to said media player and said action item is the issuance of a command to said media player to begin recording.

Application No: 09/821,183  
Attorney's Docket No: US010105

14. (Original) The system of claim 11, wherein said user activity suggests that said user is not paying attention to said media player and said action item is the issuance of a command to said media player to enter a power save mode.

15. (Original) The system of claim 11, wherein said user activity is a predefined gestural command and said action item is the issuance of a corresponding command to said media player.

16. (Currently Amended) A system for controlling a device, comprising:

a memory for storing computer readable code; and

a processor operatively coupled to said memory, said processor configured to:

analyze at least one of audio and video information focused on a user to identify at least one predefined user activity;

analyze additional information external to said user, wherein the additional information external to said user includes a feature of media on said device; and

perform a predefined action item based on said additional information to automatically adjust said device in accordance with action preferences of said user when said user activity is identified, wherein the predefined user activity is not related to controlling the device.

Application No: 09/821,183  
Attorney's Docket No: US010105

17. (Currently Amended) The system of claim 16, wherein said device is a media player, and said user activity suggests that said user is not paying attention to said device, and said action item is the issuance of a command to pause said media player.

18. (Currently Amended) The system of claim 16, wherein said device is a media player, and said user activity suggests that said user is not paying attention to said media player, and said action item is the issuance of a command to said media player to begin recording.

19. (Currently Amended) The system of claim 16, wherein said device is a media player, and said user activity suggests that said user is not paying attention to said media player, and said action item is the issuance of a command to said media player to enter a power save mode.

20. (Cancelled).

21. (Currently Amended) An article of manufacture for controlling a media player, comprising:

a computer readable medium having computer readable code means embodied thereon,  
said computer readable program code means comprising:

a step to establish at least one rule defining a predefined user activity, said rule  
including at least one condition and an action item to be performed to automatically adjust said
